Jonathan S. Foote

385.230.8898 | jonnyfoote27@gmail.com | linkedin.com/in/jonathan-foote-657131254 | Highland, UT

Product manager and former software engineer studying Information Systems at BYU who turns customer feedback into detailed product requirements and ships SaaS features with engineering. Wrote ~15 PRDs in 4 months at Lumion, shipped Unified Inbox v2, SSO, and AI enrollment forms to 400+ schools, and got 4 new products approved for development. Raised an AI agent from the mid-80s to 99%+ accuracy with automated evals.

EDUCATION

Bachelor of Science, Information Systems **Expected Dec 2026**

Brigham Young University, Marriott School of Business, Provo, UT · GPA 3.37 · STEM-Designated Technical Program

- **Coursework:** IS 562 Digital Product Management (graduate-level), Enterprise App Development (React), Database Systems (SQL), Predictive Data Analytics, Machine Learning
- **Involvement:** BYU Product Management Association, Venture Capital Club, Developer Club, AIS

EXPERIENCE

Lumion *(AI-Powered B2B SaaS for Career & Trade Schools)* South Jordan, UT

Product Manager Intern *May 2026 to Sep 2026*

- Owned 10+ product areas end to end as one of two PMs at a VC-backed startup, working directly with the CEO, engineering, support, and sales; wrote ~15 PRDs in 4 months and got 4 new products approved for development.
- Turned a customer need found in ~30 discovery conversations into a launched product concept, positioning, and pricing against vendor costs, from idea to approval in 7 weeks.
- Analyzed data to find an operational gap (one student got 26 reminders in a day), helped automate 4,000+ overdue accounts, replacing ~300 hours of manual entry; made a $10K/month savings case.
- Integrated a third-party vendor API for a new product and worked with support and sales on customer feedback, release notes, and documentation for each launch.
- Kept Lumion's AI agent on a measurable path: sorted thousands of real conversations by failure type, tested fixes with automated evals, and raised accuracy from the mid-80s to 99%+.
- Shipped Unified Inbox v2, SSO, and AI enrollment forms for 400+ schools; coordinated launch timelines with engineering, support, and sales, and trained 7+ teammates.

  Lumion CEO, on LinkedIn: "He treated the conversations our AI was having as the product rather than a byproduct of it."

Banner Analytics *(Data Infrastructure & Analytics Startup)* Highland, UT

Software Engineer *Jun 2025 to Jan 2026*

- Built end-to-end data pipelines and dashboards for non-technical stakeholders, tracing data across systems and turning ambiguous priorities into executable workstreams.

Vermilion Rock Advisors *(Middle-Market M&A Advisory)* St. George, UT (Remote)

Analyst *Nov 2024 to Jun 2025*

- Interviewed 150+ C-level executives and PE sponsors for market and competitive research and turned the conversations into written analyses and presentations that drove deal decisions.
- Managed a 2,000+ opportunity pipeline across 6 active deals in Excel, coordinating timelines and deliverables across stakeholders.

Grandeur Peak Global Advisors *(Small-Mid Cap Global Equities)* Salt Lake City, UT

Research Analyst Intern *Nov 2022 to Oct 2023*

- Led consumer, SaaS, and fintech deep-dives, interviewing 100+ executives and writing investment memos; recommendations beat benchmarks by 320 bps.

SELECTED PROJECTS

- **Who Built All This?** *(zero-to-one consumer SaaS, solo):* designed and shipped a live, AI-powered road-trip companion (React, TypeScript, Supabase, Stripe) with active users; owned architecture, billing, and integrations end to end.
- **Haven of Hope** *(team project, BYU):* built an AI chat widget (Claude API) for a Philippine child-protection nonprofit.

SKILLS & TOOLS

- **AI & LLM:** uses Claude Code daily across research, data analysis, PRDs, and prototyping (skills, sub-agents, MCP); shipped LLM apps on the Claude API; AI evals (DeepEval / Confident AI); ChatGPT, Codex, Cursor, Lovable
- **Product Management:** Product requirements and PRDs, product roadmaps, SaaS product development, cross-team collaboration with engineering, customer feedback, release notes and documentation, A/B testing, SQL, Figma, Linear
- **Technical:** APIs and integrations (Google, Claude, postcard mailing), Python, SQL, TypeScript, React, Figma, Git, Linear, Notion

ADDITIONAL

- **Speaking & languages:** BYU invited speaker on AI-native product work (Sep 2026); speaks German.
- **AI case study:** built and pitched "Resolve," an AI returns-agent prototype (React, AI chat, policy editor, decision trace).
- **Grit:** ultramarathoner, 1st place (50 mi) and 5th place (101 mi).
